

ALL-IN-ONE DESIGN

Simplify the wiring of aftermarket equipment into any vehicle. Kerr Industries' team of engineers have developed a fuse panel specifically for the aftermarket automotive industry.

- Compact design
- Easy to use and understand
- Simplified aftermarket circuits (dedicated circuits for added equipment, simplifying both installation & diagnosis)
- 5 battery direct circuits
- 5 ignition switched circuits
- Panel rated at 100 amps overall
- 3 year warranty
- 3 timed circuits with their own timers, each of which are easily set
- 4 different time settings per timer for automatic shut-off of equipment at selected intervals
- Each circuit can carry a maximum load of 30 amps
- Fuse panel is expandable when more circuits are required
- Individual LED fuse status indicators provide easy trouble shooting, showing faulty circuits at a glance

Available as parts only or installed in select vehicles as part of Kerr's equipment integration program. Contact us for more information on this and other innovative and useful aftermarket integration products.
