

BIT 13

ALL-IN-ONE DESIGN

Simplify the wiring of aftermarket equipment into any vehicle. Using the experience gained from upfitting thousands of vehicles over many years the engineers at Kerr have developed a fuse panel specifically for the aftermarket automotive industry.

Panel features include:

- Compact design
- Easy to use and understand
- Simplifies aftermarket circuits (Dedicated circuits for added equipment, simplifying both installation & diagnosis)
- 5 battery direct circuits
- 5 ignition switched circuits
- Panel rated at 100 amps overall
- 3 Year Warranty
- 3 timed circuits each with its own timer; timers are easily set without special tools or programming
- 4 different time settings per timer for automatic shut-off of equipment at selected intervals: 30 mins, 1 hr, 2 hrs, 4 hrs
- Each circuit can carry a maximum load of 30 amps
- Fuse panel is expandable when more circuits are needed
- Individual LED fuse status indicators provide easy trouble shooting, showing faulty circuits at a glance

Available as parts only or installed in select vehicles as part of Kerr's equipment integration program
